May 2009

Hot New Varieties

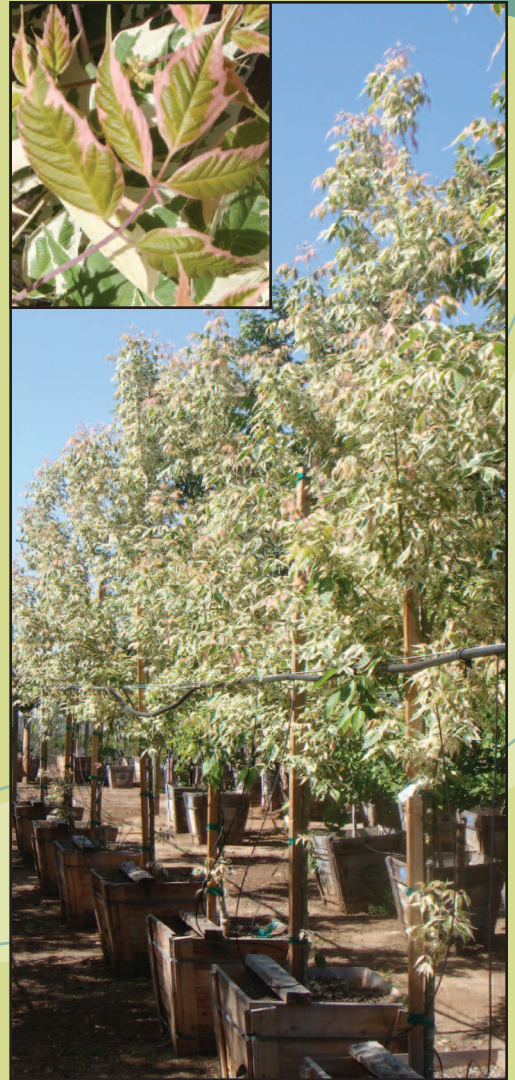

Hybrids are known to have interesting colors and to be more resistant to pests and diseases. Check out these exciting new additions...

Scaevola 'Whirlwind White' creates a green blanket speckled with pure white, fan-shaped flowers all season. Great as a low maintenance groundcover or edging plant, as it requires no deadheading and is tolerant of both heat and drought.

Heuchera 'Beaujolais' is vibrantly colored, shade hardy, and has huge purple leaves with a silver overlay. It is one of four exciting new Heucheras at Miramar.

Acer negundo 'Flamingo' is a gorgeous tree with pink new growth that fades to green with white margins. 'Flamingo' has a delicate appearance, and is great for lightening shadier spots with its pink and white variegation.
