

What's. Growing On...

August 2009

Water Smart Shrubs

Create eye-catching accents with out running up your water bill.

Lantana 'Gold Mound' (bottom left)

Tight clusters of tiny, deep-yellow flowers are framed by dark green leaves on this nearly ever blooming shrub. Other popular varieties in stock include: Spreading Lavender, Spreading White, Dallas Red, Irene, Radiation and Confetti.

Rosmarinus o. 'Prostratus' Creeping Rosemary (Bottom Right)

Cascades nicely over walls or raised planters. Flowers appear in the winter, spring and intermittently throughout the rest of the year. This rosemary does well near the coast, as it handles salt spray, and tolerates any soil with decent drainage.

Nerium oleander 'Pink Beauty' (Right)

This fast growing, evergreen shrub flaunts striking clusters of single pink blooms. It's a perfect plant for a drought tolerant, low maintenance hedge or screen. It's also commonly used as a container plant and available in a variety of other colors.
